The official choice of the Democratic Party

“I've watched Raul dedicate his life to creating opportunities for kids. In the State Assembly, he will fight for better schools, more after-school programs, and ensure every child has access to a college education.”
— ALEX REZA
RAUL BOCANEGRA'S HIGH SCHOOL TEACHER

Supported by Teachers, Parents, and Youth Advocates

RAUL BOCANEGRA FOR STATE ASSEMBLY

Good schools and new opportunities are how our children will succeed

RAUL BOCANEGRA FOR STATE ASSEMBLY

RAUL BOCANEGRA *is working to improve our schools and give students the tools to succeed*

Raul Bocanegra grew up attending local public schools in San Fernando.

He was lucky to have good teachers, coaches, and mentors who encouraged him to stay out of trouble, study hard and go to college. Raul took advantage of those opportunities, graduated from San Fernando High and went on to earn a Master's Degree from UCLA.

As he got older, Raul realized that students in other parts of the Valley weren't so lucky. Without access to good schools and mentors, too many kids were heading down the wrong path.

Raul decided that he wanted to fix this problem. He understands the power of a good education and the vital role good schools play in helping local residents get good jobs and attracting more small businesses to our communities.

That is why, in the State Assembly and in the classroom, Raul has made strengthening our neighborhood schools and creating new opportunities for children his life's work.

As a Professor at CSUN, youth advocate, and State Legislator, Raul has spent over 20 years working to give Valley kids the same opportunities he had — good schools, safe places to play after-school, and a good job or college education.

Raul is endorsed by Teachers, Parents, and the Democratic Party

Raul's Record of Results for Our Schools

- ✓ **Created after-school and summer programs to keep kids on the right path and away from drugs and gangs**
- ✓ **Expanded financial aid for working families to make college more affordable**
- ✓ **Reinvested in our schools to put more resources in the classroom and improve computer and science labs**
- ✓ **Worked with educators to modernize the school curriculum to better prepare students for college or a career**
- ✓ **Expanded job training and vocational learning programs to give students the tools to get good jobs now**
